

Cloud based CI/CD architecture for a Consumer Electronics Major

PROJECT SCOPE

- // To create a cloud based CI/CD architecture that is scalable, flexible and easily manageable, supports thousands of developers, more commits/second and petabytes of data

SOLUTION HIGHLIGHTS

- // Cloud based on demand scalable CI solution that serves 400 VMs
- // Spins up and tears down servers as the peak time load goes up
- // New storage architecture that is built using AWS Elastic Block storage
